IOW, BS. It assesses the sustainability of the Directive by comparing it to principles of sustainable development and to data on the impacts of biofuels.

Land is generally cheaper than all structures, and in most places it is huge. Just as is the case for any capital venture, profitability for investors is the key. This is less true of biofuels made with foreign feedstocks since they depend on weaker foreign environmental legislation according to ECOFYS analyses. But they are much more expensive than the raceway ponds. It is common for entire projects to be scrapped after months and even years of work, once implementation is attempted. This works out to about 1.
